EXPERIENCE

Self-Initiated Projects.

August 2023 — Present

- Built and deployed multiple responsive web applications using **HTML, CSS, JavaScript (ES6+), and TailwindCSS**, ensuring mobile-first design and performance optimization.
- Applied effective **version control workflows** with Git and GitHub, managing branches, pull requests, and conflict resolution in collaborative environments.
- Enhanced accessibility and applied **basic SEO principles**, improving visibility and usability across devices and users.
- Boosted **user engagement by 30%** through the integration of interactive features and DOM manipulation using vanilla JavaScript.
- Managed deployment using **GitHub Pages and Netlify**, including configuration of custom domains and hosting logistics.
- Project portfolio with live demos and code repositories available upon request or via portfolio link.
